

Banking Information

In order to comply with Sellstate's centralized processing systems and expedite procedures, you will need to open a Business National Checking Account with an approved Sellstate bank.

You must inform the bank that you are giving Sellstate Realty Systems Network, Inc. Online Treasury Management access for both debit and credit. Be sure to order both checks and deposit slips for your new account. This must be done ASAP, as this procedure sometimes will take 30 days to implement.

The following banking representatives are familiar with Sellstate's Online Treasury Management procedures. Please do not go into a local branch to open an account because the account will not be set up correctly.
