

Social Networking

Social Networking

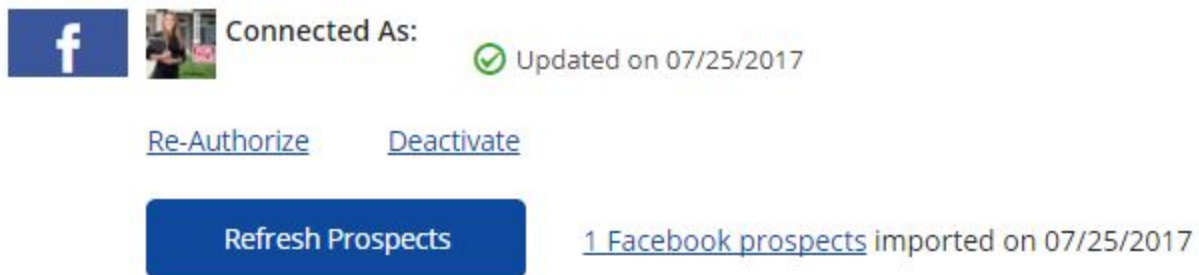

It's all about connecting! Connect your Power Suite account to your favorite social networks and login to one place for all your updates.

Leverage your connections to potential clients via Social Media. Connect to one or more of your

Social Media accounts to import your prospects. You will then be able to add them as a contact to send a tailored CMA Report, Buyers Report or targeted Email Campaign.

To set up your Social Network connections, like Facebook, Google+, and Twitter within the Power Suite, just select the "Connect With..." button for that Media page. A login screen will prompt you to either enter in your Username and Password for that page, or if you are already logged in to that page, it will connect automatically.

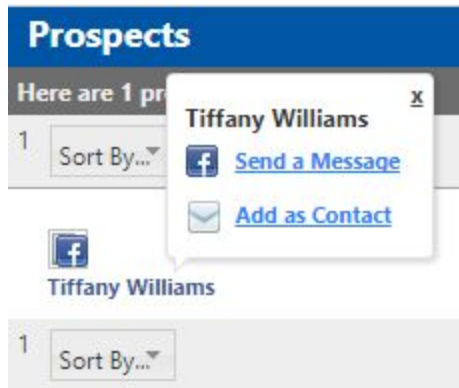

Some applications require authorization, but that is just so we have permission to bring the contact information into the Social Networking App for you to utilize.

Social Networking

You can always Deactivate the connection or re-import the list as it does not do so automatically upon logging into your LeadStreet Dashboard.

Prospects

You can send your client a message via your social connection or add them as a contact in LeadStreet. When you import the prospects from your social media they are NOT automatically added to your contact list.

Importing the prospects simply makes it easy for you to add them to your contact list if you want to communicate directly with them. That means you can import prospects from Facebook, Twitter, Google+!
